

Verleng systeem voor Acetyleen lassen op rol

Productcode: 1057
Beschikbaarheid: Niet op voorraad

Prijs: 159,00 €

Omschrijving

We kennen allemaal het gemak van verlengkabels en luchtslangen op een rol.

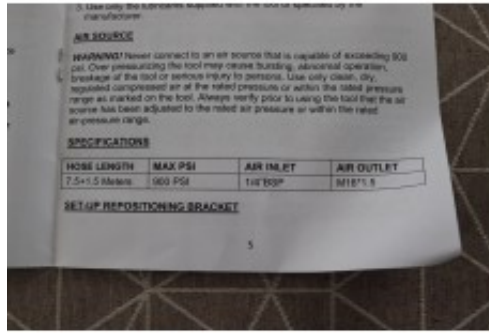

Dit gereedschap is gebaseerd op hetzelfde principe : het verlengt de zuurstof en acetyleen slang met 7,6 meter en is opgerold op een oprolmechanisme.

Als u dus gedaan hebt met lassen trekt u even aan de kabel en het geheel rolt zichzelf opnieuw op. Gedaan met het rondrijden met het zware wagen met beide flessen. Deze kunnen vanaf nu veilig op hun plaats blijven staan ergens aan de zijkant van uw atelier.

Dit gereedschap bespaart u veel tijd, gesleur en maakt uw werkplaats stukken veiliger.

Product galerij

Use only the substrate specified in the application by the manufacturer.

AIR SOURCE

WARNING! Never connect to an air source that is capable of exceeding 900 psi. Over pressurizing the tool may cause bursting, abnormal operation, breakage of the tool or serious injury to persons. Use only clean, dry, regulated compressed air at the rated pressure or within the rated pressure range as marked on the tool. Always verify prior to using the tool that the air source has been adjusted to the rated air pressure or within the rated air pressure range.

SPECIFICATIONS

HOSE LENGTH	MAX PSI	AIR INLET	AIR OUTLET
7.5+1.5 Meters	900 PSI	1/4" BSP	M18*1.8

SETUP REPOSITIONING BRACKET

1. Connect the hose to the substrate using the instructions in this manual. If needed, use the correct substrate pressure grade. Refer to the substrate manufacturer for details.

WARNING!

1. Do not use the substrate on any surface that is not specified in the manual. Do not use the substrate on any surface that is not specified in the manual. Do not use the substrate on any surface that is not specified in the manual.

SETUP

1. Connect the hose to the substrate using the instructions in this manual. If needed, use the correct substrate pressure grade. Refer to the substrate manufacturer for details.

2. To use the hose and tool, connect the hose to the substrate using the instructions in this manual. If needed, use the correct substrate pressure grade. Refer to the substrate manufacturer for details.

3. To use the hose and tool, connect the hose to the substrate using the instructions in this manual. If needed, use the correct substrate pressure grade. Refer to the substrate manufacturer for details.

4. To use the hose and tool, connect the hose to the substrate using the instructions in this manual. If needed, use the correct substrate pressure grade. Refer to the substrate manufacturer for details.

MAINTENANCE

1. Check the hose and tool for damage before use.

2. Check the hose and tool for damage before use.

3. Check the hose and tool for damage before use.

4. Check the hose and tool for damage before use.

5. Check the hose and tool for damage before use.

6. Check the hose and tool for damage before use.
